

I am very concerned for K-Love Radio which is a listener-supported radio station heard over FM translator service (89.9, 96.3 and 104.3) in Lexington, KY. This station serves me as a resident to hear positive Christian music (without commercials).

If LPFM is allowed it will displace K-Love Radio and I would be unable to receive this type of positive music and programming.

I believe it is in the public interest to keep stations like K-Love on the air as it provides family-friendly programming and has an encouraging impact on the communities it serves in our hectic times.
